TELECOMMUNICATION

Our range of services extends beyond traditional telecommunications as we specialize in delivering comprehensive solutions for complex projects, including civil, power, and electromechanical works. As a fully integrated service provider, we handle every aspect of the project, from site acquisition to site surveys, design, implementation, testing, and commissioning. We ensure seamless integration of all components involved.

Our services include;

- FTTx Services
- Mobile Services (Telecom & Civil) Networking
- ISO/OSP Maintenance Services
- Inbuilding Solutions (IBS)

IT INFRASTRUCTURE

The products and services offerings under IT infrastructure vary depending on the specific needs and requirements of businesses. Some common offerings include:

1. **Storage Solutions:** We offer a range of Storage Solutions includes servers, storage devices, networking equipment, and other physical components necessary to build and maintain an IT infrastructure.
2. **Networking:** We offer a range of Networking Solutions includes the design, implementation, and management of network infrastructure, includes Structural Cabling (Copper & Fiber Optic Cable Solutions) and Active Networking Solutions like Switches, routers, firewalls and wireless access points.
3. **Cloud services:** Many businesses choose to leverage cloud computing to enhance their IT infrastructure. We offer a range of services, including infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS).
4. **Security solutions:** We understand that IT infrastructure needs robust security measures to protect against cyber threats. We offer a range of Cybersecurity Solutions, Antivirus Software, Intrusion Detection and Prevention Systems and Encryption Tools.
5. **IT consulting and support:** Businesses often require expert guidance in designing, implementing, and managing their IT infrastructure. We offer services such as infrastructure assessment, capacity planning, and ongoing support.
6. **Managed services:** Many organizations prefer to outsource the management of their IT infrastructure to specialized service providers. We offer a range of services, including monitoring, maintenance, and troubleshooting. It's important for businesses to carefully assess their needs and work with IT professionals to determine the most suitable products and services offerings for their specific infrastructure requirements.
